Docket No.: 2611-0198P

REMARKS

Claims 17-24 are currently pending, wherein claims 21-24 have been added and claims

17-20 have been amended to correct typographical errors and more clearly define the invention.

Favorable reconsideration is respectfully requested in view of the remarks presented herein

below.

In paragraph 3 of the Office action ("Action"), the Examiner rejects claims 17-20 under

 $35~U.S.C.~\S\ 102(e)$ as allegedly being anticipated by U.S. Patent No. 5,835,493 to Magee et al.

("Magee"). Applicant respectfully traverses this rejection.

It is well known that in order to support a rejection under 35 U.S.C. §102, the cited

reference must teach each and every claimed element. Thus, if the cited reference fails to teach

or suggest one or more elements, then the rejection is improper and must be withdrawn. In the

present case, claims 17-20 are not anticipated by Magee for at least the reason that Magee fails to

teach or suggest preferentially multiplexing selected media information packets containing clock

information as recited in claims 17 and 19, from which claims 18 and 20 respectfully depend.

Accordingly, Applicant respectfully requests that the rejection of claims 17-20, based on Magee,

be withdrawn.

New claims 21-24 define multiplexing and remultiplexing methods, respectfully, which

both preferentially multiplex selected media information packets containing clock information.

Therefore, new claims 21-24 are patentable over the cited prior art for at least those reasons

presented above with respect to claims 17-20.

In view of the above remarks, it is believed that all claims are allowable.
